# Service Check-Up

In order to maintain high productivity level with maximum uptime and minimum maintenance costs, it's important to run Service Check-Up regularly. During the Check-Up, our service technician inspects the machine thoroughly and delivers a detailed report to you.

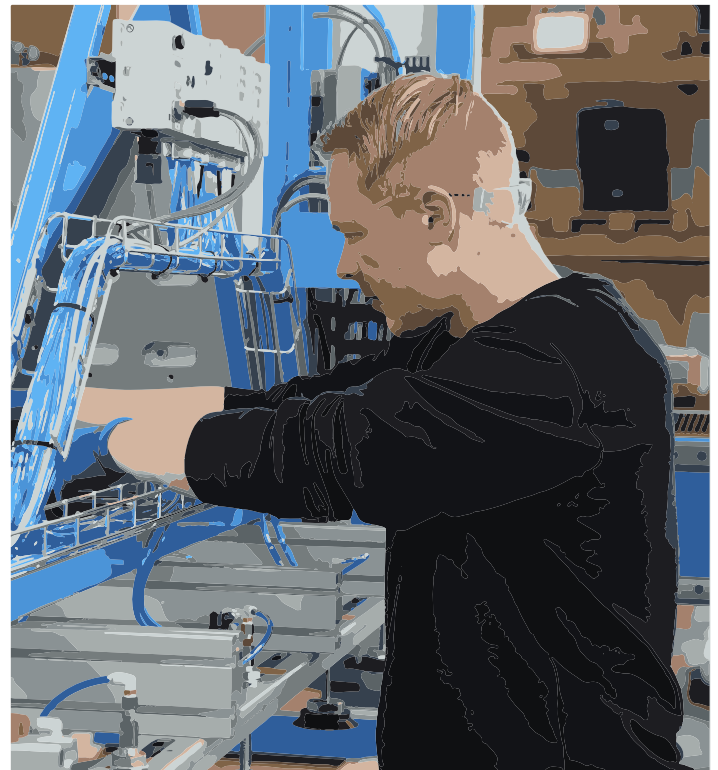

The report makes it possible to identify critical points and needed spare parts, plan the maintenance actions and schedule the downtime efficiently. For you this means reduced maintenance and downtime costs and ability to schedule coming actions effectively.

## Customer Benefits:

- Maximize the uptime and productivity
- Minimize unexpected failures
- Schedule downtime efficiently
- Reduce maintenance and downtime costs
- Control better the machine's status
- Find out the need of spare parts
- Plan maintenance actions more effectively
- Identify critical points of the machinery
- Fixed price for the check-up visit including travelling and other visit-related costs

## Service Check-Up actions:

- Assure the status of the machine through Pivatic Service Check-lists
- Review of demands for spare parts and other insufficiencies
- Execute the maintenance actions noted in earlier visit
- Lubricate the machine
